

- Diplom-Ökonom (equiv. MBA)
- State-Approved Translator German/English
- Trainer, Motivator, Coach
- Software Developer
- System Administrator
- Software and System Architect

Contact Data

Address: Mülheimer Straße 133, Appt. 255
D-51469 Bergisch Gladbach, Germany

Phone: +49 2202 817157 (home) or +49 178 9759012 (mobile)

E-mail: jakobs@plausibolo.de

Web: <http://plausibolo.de>

Experience

As Lecturer: Training of computer scientists preparing them for state-approved exams in all core subjects of computer science: programming languages, databases, operating systems, networking, Internet, mobile computing including development of syllabi and creation and assessment of state-approved final examinations.

As Consultant: Leadership of teams, rhetoric, didactics, motivation, negotiation, recruitment, personnel evaluation, employee selection, software development for various platforms and mobile devices, software architecture of projects on centralised platforms (DOS/VSE) as well as decentralised architectures, implemented in Java and other, dynamic languages.

Qualification

Education:

- Diplom-Ökonom (equiv. MBA), specialised in commercial information technology
- state-approved translator German/English (Chamber of Industry and Commerce)

Languages:

German: native	
English: perfect	certified translator
Dutch: fluent	TELC B1 „very good“
Turkish: good	Institute University Ankara B1 „good“

Certificates and Trainings: 2015 – Axelos PRINCE2® Practitioner Examination
2015 – “Python complete” course by GFU, Cologne
2015 – Java EE Master Class, by Gedoplan/GFU
2014 – Axelos PRINCE2® Foundation Examination
2013 – Novell DC Tech Spec, SUSE 11 Tech Spec, SUSE CLA 11
2013 – LPIC-2 Linux Professional Institute Certification Level 2
2013 – LPIC-1 Linux Professional Institute Certification Level 1
2012 – Querenburg Institute – optimising of learning processes
2007 – The European Language Certificate – Dutch B1
2005 – ORACLE – object-relational development, Java, XML
2005 – District Council Düsseldorf – approval state examination
2004 – b.i.b. – method training leadership of groups
2003 – b.i.b. – method training mnemotechnics
2002 – Institute Dr. Müller – communication techniques
2001 – DQS-Impact – process oriented quality management
2000 – CERT-Consult – total quality management
1998 – Schumann AG – distinction for special accomplishment
1996 – Language Institute University Ankara – Turkish B1
1986 – FWS/VidG – dialectics in negotiation and discussion
1990 – HP – 958 System Manager HPUX/800
1994 – Chamber of Industry and Commerce – state-approved translator German/English
1979 – Kraftwerk Union – welding and metal working
1978 – driving licence (A, BE, C1E, ML)

Topics and Systems

Operating Systems: Unix, Linux, Windows, Android

Programming Languages: **C/C++**, **Java EE**, **SQL + PL/SQL**, **Tcl/Tk**, **Shell**,
FORTRAN, COBOL, **XSLT2**, PHP, Python 3

Further Languages and **HTML**, **XHTML**, **HTML5**, jQuery, **XML**, **XSD**, Drupal,
Products: **PostgreSQL**, Oracle, Eclipse, **Android**, CVS, git,
Mercurial, Office, LaTeX, **System Administration of
Linux**, Unix and Windows, **PostgreSQL Database
Administration and Development**

Design: UML, UML2, Hard- and Software Architecture

Networking: ISO-OSI, TCP/IP, IPv6, VPN

Curriculum Vitae

Professional Experience

- since 10/2013 Freelance Software Architect and Trainer; development of applications for the real estate sector
Focus on training for Android app development, SQL, XML/XSLT, XML+Java, C++11, Linux Server administration, PostgreSQL administration and programming
Development of three Android apps including server components and PC applications for the real estate sector, to be marketed late 2015/early 2016
- 2001 – 9/2013 Lecturer Computer Science, b.i.b. International College in Bergisch Gladbach, Germany
Database systems, operating systems, networking with TCP/IP, Internet technology, software engineering, programming, development of native Android Apps
- 2001 Project Manager: Coordination of vocational IT training, Bayer AG in Leverkusen, Germany
Coordination and supervision of the cooperation with a private university, supervision of student apprentices in the IT department
- 1999 – 2001 Lecturer Computer Science, b.i.b. International College in Bergisch Gladbach, Germany, details see above
- 1997 – 1999 IT consultant, Schumann AG in Köln
IT consulting in various projects, among others at the head office of a leading bank in Frankfurt implementing the Capital Adequacy Directive in C++
- 1987 – 1997 Lecturer Computer Science, b.i.b. International College in Bergisch Gladbach, Germany, details see above
- 1986 – 1987 Software Developer, ALAC Software GmbH in Cologne
Development of software using Professional Pascal for IBM Germany
- 1986 – 1987 System Programmer, Johnson & Johnson GmbH, Düsseldorf, Germany
Junior System Programmer for IBM DOS/VSE, CICS, VM/CMS

- 1984 – 1985 Lecturer, bfw Vocational Training Center, Essen, Germany
8 months 1 full day per week lecturer for planning techniques and information technology in a vocational training course in business and economics for technicians
- 1979 Salesman, „Quelle“ department store in Duisburg, Germany
6 months full-time salesman between high school and beginning of studies at the university

Education/Qualification

- 1994 Certification as a state-approved translator German/English at the Chamber of Industry and Commerce, grade “good”
- 1980 – 1985 Studies of Commercial Information Technology, University Duisburg, graduation as Diplom-Ökonom (equivalent MBA), grade “good”
- 1979 – 1980 Studies of Electrical Engineering, University Dortmund
- 1970 – 1979 Grammar School Broich in Mülheim an der Ruhr, A Levels
advanced courses in mathematics and chemistry
- 1966 – 1970 Elementary School in Mülheim an der Ruhr

HOLGER JAKOBS, BERGISCH GLADBACH

Overview over Large Projects

teaching: many years of experience in vocational training of state-approved computer scientists in all major subjects of the IT core fields:

- operating systems (Windows, Unix, Linux, Mac) and networks (LAN, WLAN, TCP/IP) from network planning to socket programming, IT security (access management, encryption, intrusion detection, backup technology)
- database systems (PostgreSQL, Oracle, SQLite)
- various programming languages (Pascal, Fortran, C, C++, Java, dynamic languages)
- web development with HTML5, CSS3, JavaScript, Ajax, PHP, JSP
- mobile computing, mobile web pages and especially development of native Android apps
- development tools, Eclipse, Mercurial, ADT
- XML, XSLT, XML Schema

Besides teaching I also design courses and curricula. I formulate the state-approved examinations and mark them.

development putting the capital requirements directive into practise for a leading German bank

documentation: creation of an operations manual in English for an international logistics company

development: design and implementation of various services on Sun Solaris and Macintosh Server for the management of orders in the advertising industry, picture processing, database export and import

development: design an implementation of apps for real-estate

Kinds of Projects I Would Be Interested In

- Java** All kinds of Java-based software, especially Java EE including database access (Java Persistence API, JPA), are interesting projects to me.
- RDBMS** Since I regard good creation and maintenance of relational databases as crucial for performance, according to my opinion just relying on the ORM (object-relational mapper) to create data structures often yields unsatisfactory results.
- Web** Many Web sites will have to be updated to the current HTML5 standard and thus be re-launched. The new approach is “mobile first” and has to use responsive Web design in order to reach as many customers as possible. Interesting evolving technologies are AngularJS and Meteor.
- Mobile** Apps have been in the focus of many projects. The Web has to be re-done due to HTML5, and mobile apps will have to be added to the IT portfolio of corporations. Whether the app will be native Android or based on web technology (e. g. PhoneGap), I am ready to put this into practise.
- Many mobile Apps need to be embedded into existing IT infrastructures, taking care of all security concerns involved.
- Teaching/Training** Since I have been a teacher and trainer for decades, I would be happy to teach any topic I know something about. Whether it is an IT related topic, rhetorics, writing techniques, English or German language – just ask.
-

List of Projects

- 2014 development of Android apps for a consulting company and for the real-estate sector including a server component
several trainings for customers in the industry, mainly Android, Linux servers, XML, C++ and database development with SQL and PostgreSQL administration
- 2001 – 2013 teaching at a state-approved vocation training college including creation of curricula
- 2011 – 2012 management of a student project designing and implementing a client for an international hotel reservation company to be deployed as a web app
used tools: Google Web Toolkit, Java, Eclipse
- 2011 – 2012 management of a student project evaluating and comparing MonoDroid and MonoTouch for the platform independent development of native apps
used tools: MonoDroid, Java, Eclipse, MonoTouch, Objective-C, X-Code
- 2011 – 2012 management of a student project designing and implementing an app for restaurant waiters on mobile devices
used tools: m-project, JavaScript, Eclipse, MySQL
- 2010 – 2012 design, planning and implementation of a fully automated video surveillance system for a large apartment block integrating ip and video cameras with history processing and movement detection
used tools: ip cameras, video grabbing hardware, motion tool, cron, Tcl
- 2010 – 2012 IT consulting, re-design and implementation of a system for order processing and archiving running on a Macintosh server replacing a commercial system on Solaris for a large communication and media agency in Cologne
used tools: ImageMagick, Tcl, ASED, SQLite, MacOS

List of Projects

- 2009 – 2011 design of a relational database system for a customer relationship management system for a home owners' association and merging data from several data sources. Consulting regarding the implementation of the front end application
used tools: PostgreSQL, Java, Swing, Hibernate
- 2008 – 2009 design and implementation of a middleware and connecting apps for various types of mobile devices (traditional mobile phones, Samsung feature phones, iPhones and Android handsets) for displaying student timetables, QR code generation
used tools: Samsung development set, XHTML, XML processing, Tcl, regular expressions, jQuery, Widgets
- 2007 translation and proofreading of curricula of an international vocational training college regarding the international accreditation of credit points for a bachelor's degree course
used tools: word processor
- 2006 – 2008 IT consulting, design and implementation of a system for picture processing and archiving for a large communication and media agency in Cologne
used tools: Sun Solaris with CDE, Exceed X Server, Helios server products, ASED, Tcl
- 2002 – 2007 configuration of a file, mail and application server for a theater in Cologne, Windows NT domain with Samba, system management, administration and remote monitoring
used tools: SuSE Linux, system and log tools
- 2002 – 2004 IT consulting, design and implementation of a system for order processing for a large communication and media agency in Cologne.
used tools: Sun Solaris with CDE, Exceed X Server, Helios server products, ASED, Tcl, ftp, cron
- 2002 server configuration including backup and firewall for a real estate agency in Cologne, Germany
used tools: Linux, ip tables, rsync, samba, Windows XP

List of Projects

- 2002 – 2003 creation of a library accessing various information sources and implementation of a number of tools for student management, including forms processing for an international vocational training college
used tools: Tcl, Lotus Notes, regular expressions
- 2001 design and implementation of an intern application management system for the IT department of a large industry company
used tools: Microsoft Access, Tcl, Lotus Notes Mail
- 1997 – 1998 putting the capital requirements directive into practise for a leading German bank, development on Sun Solaris with C++ in order to daily assess the global pool of shares, bonds and derivatives. Parallelisation of the assessment process with self-written paralleliser and result merger in C.
used tools: Sun Workshop (TeamWare version control, C/C++ compiler), emacs, Microsoft Office, Samba
